Electrical Components International Expands Facilities for its Automotive and Specialty Division

St. Louis, Missouri, 8/10/2007– Electrical Components International, (ECI), is pleased to announce the creation of a new sales and engineering office for its automotive and specialty division.

The office, located in Northville, Michigan, is an expanded space that consolidates several functions under one roof to improve service and responsiveness to customers. The Northville office has an enhanced area for automotive engineering that includes application engineering, product engineering, product design (CAD) and prototyping. The office houses 14 employees, and also replaces an office previously located in Westland, Michigan.

ECI's new sales and engineering office for automotive and specialty products. ECI purchased this division from NOMA Corporation, a subsidiary of GenTek, in February 2007.

ECI is proud of this substantial investment in their growing automotive and specialty segment. The enhanced office allows the company to provide world-class support for existing customers and a platform to support new business.

The office opened August 6, 2007 at the below address:

**Electrical Components International
22260 Haggerty Road
Suite 110
Northville, MI 48176
Ph: 248.344.7599
Fax: 248.344.7589**

We encourage all our customers and suppliers to come see the new office. Please call us at the above number to schedule a visit.
