ECI Announces New Facility in Futian, China

St. Louis, Missouri, June 8, 2006 - Electrical Components International (ECI) has announced that their new state of the art manufacturing facility is nearing completion in Futian (Huizhou City, Guandong) China. The manufacturing plant will cover some 25,500 square meters and will employ more than 1000. The facility is being built to provide more low cost manufacturing options for ECI's expanding worldwide customer base. ECI is a leading global provider of wire harnesses, subassemblies, and value-added assembly services to manufacturers of white goods, commercial and industrial products, and transportation equipment. The Futian facility is expected to be completed in August of 2006.

About Electrical Components International

Electrical Components International, formerly Wire Harness Industries, Inc., is a leading global supplier of wire harnesses, subassemblies, and value-added assembly services, with a leading position in the North American white goods industry. ECI's products can be found in a wide variety of electronic and electro-mechanical applications, including home appliances, transportation equipment, heating, ventilation and air conditioning (HVAC) products, construction and agricultural equipment, and vending and industrial machines.
